

APPLICATION TIPS:

Youngblood Ultimate Concealer has the perfect blend of light reflecting minerals to not only make your skin look smoother; but to draw attention away from dark circles and diffuse tiny lines. It is excellent as a base for further enhancing the performance of eyeshadows. Also, use it to accentuate your lips and give the appearance of "pouty" lips.

Using your ring finger or YB Lip/Eye Brush apply a small amount of Concealer to dark circles. Blend Concealer well. You may apply Rice Setting Powder to increase performance.

Use a YB Lip/Eye Brush to apply Concealer to the entire lid area as a base for eyeshadow: The Concealer smoothes the eye lid and further enhances the performance of your eyeshadow. To create a crème base eyeshadow, mix eyeshadows with the Concealer before applying.

With a YB Lip/Eye Brush, apply and blend Concealer around the edges of the lips to give the appearance of a fuller lip.
