

APPLICATION TIPS:

Youngblood Eye Liner Pencils are fabulous for defining the eyes for a soft, subtle daytime look or for really adding drama to a night-time eye.

For soft, daytime eyes: use Chestnut with our "warm" undertone Eyeshadows such as, Sedona, Coco or Carnelian or Slate with our "cool" undertone Eyeshadows like Cashmere, Heather Smoke and Azurite.

For dramatic, nighttime eyes: use Black with any of our Eyeshadows to create a bold look. To soften the line a bit, try adding Raven or Cashmere and smudge. Also, adding an all-over lid color like Morganite will soften the look as well. Remember, if your eyes are small, only line the TOP lid.

To brighten the entire eye area: try dusting a bit of Moonstone or Tourmaline onto the inner corners of the eye.
